

# SIMPLER TECHNOLOGIES

## ERP SOFTWARE DEVELOPMENT COMPANY

### Subject: Internship Opportunity with Simpler Technologies

Dear Interns,

We are Simpler Technologies, an ERP solutions company. Like many businesses, after COVID-19 and the rise of AI/ChatGPT adoption in various industries, we have faced challenges in receiving projects and are currently working hard to sustain ourselves.

To support our company and aspiring professionals like you, we will create a complete work history for you at Rs. 249, which includes:

- The date when you applied for the internship
- The stipend/amount you received during the internship
- A job offer letter from our company after the internship
- The salary details you would receive while working in our company
- A 3 years Work Experience Certificate
- A Letter of Recommendation
- A record showing that you have been working with us since your 3rd year, creating a full and continuous work history

All documents will come with our genuine seal and signature and will be 100% verifiable. This is 100% genuine and legal, and we take full responsibility for everything—your work history, the projects you have handled, and the experience mentioned in your internship records.

This complete work history will make it much easier for you to get a job, as experienced professionals are always preferred over freshers.

We are a team of 367 members, working together to keep the company moving forward. This is not about pressure—there are no hard feelings if you choose not to participate.

☞ If you are interested, please reply with “Interested” along with your WhatsApp number and email ID, and we will contact you.

Our company location is genuine, and we are transparent about being a surviving company that is doing everything possible to adapt and grow.

Thank you for understanding.

Warm regards,

Simpler Technologies

Best regards,

  
**Harjeet Khanduja**
